Idaho's Secondary Health Professions Programs

IDAHO'S SECONDARY HEALTH PROFESSIONS EDUCATION PROGRAM

Idaho's health care industry needs doctors, nurses, technologists, therapists, technicians and aides in diagnostic, therapeutic, environmental and information services.

To help meet this need, Idaho secondary health professions programs are available to school districts. State approved programs receive a grant that helps in purchasing necessary instructional resources, such as supplies and equipment.

Students explore a wide variety of career options in the health professions. They learn important knowledge and skills in medical terminology and human structure and function. They receive training as health care aides.

Leadership development is available through Idaho-HOSA – state affiliate of Health Occupations Students of America (HOSA).

Upon completion of Idaho's recommended secondary health professions education program, graduates are eligible for entry level employment as aides. They may receive college credit at participating postsecondary institutions. This helps to improve the chances of admission into highly competitive collegiate health professions programs.

CURRICULA CAPSTONE COURSES

(SENIOR YEAR)

- Emergency Medical Technician – Basic
- Fundamentals of Dental Assisting
- Health Unit Clerk / Coordinator
- Home Care Aide
- Nursing Assisting
- Medical Assistant: Admin. / Clinical
- Mental Health Assistant
- Physical Therapy Aide
- Occupational Therapy Aide
- Sports Medicine / Athletic Training
- Medical Records

INSTRUCTOR QUALIFICATIONS

Secondary health professions educators are not required to possess a Baccalaureate degree. However, they must be currently credentialed as health professions and certified / certifiable as a professional-technical educator by the Idaho Division of Professional-Technical Education. Some credentialing agencies, like the Idaho Board of Nursing or Emergency Medical Services Bureau, may require work experience and other qualifications.

ACCORDING TO OCCUPATIONAL OUT-LOOK

“The health care services will increase 30 percent and account for 3.1 million new jobs – the largest numerical increase of any industry from 1996 – 2006.”
